

# MAPCON® CMMS Capabilities

## Planning and control at your fingertips

Combining all of your facility's maintenance needs in one powerful software application, ICM's MAPCON® CMMS delivers a professional, comprehensive solution for maintenance management that will increase staff efficiency and productivity while reducing inventory costs.

This fully functional computerized maintenance management software package combines each of the many elements essential for a highly effective maintenance department into one user-friendly system.

ICM's MAPCON® CMMS is installed as a turnkey solution, and comes populated with equipment information, users and user security, account numbers, vendors, spare part associations to equipment, preventative maintenance descriptions, and custom reports.

**MAPCON**

the energy of innovation™
