

Rotary Conditioning Equipment Applications

ICM is here to serve you for the life of your equipment

From working with you to determine the best equipment type and size for your need to offering responsive after-the-sale support, ICM is committed to your success.

ICM solutions deliver results

We work hand in hand with you throughout the entire lifecycle of your equipment, through development, engineering, installation, startup, and ongoing support.

Our top priority is to make operation and management of your conditioning equipment as simple and worry-free as possible, so you can focus on other aspects of your business.

Full-service solutions and a turnkey approach

In business for nearly 15 years and with nearly 300 conditioning vessels in our project portfolio, ICM provides complete turnkey systems incorporating durable equipment that is custom engineered to meet your drying, cooling, and conditioning needs. Our craftsmanship and equipment reliability have won us a position as a leading rotary equipment supplier in the North American market. For example, ICM rotary equipment is integrated into more than two-thirds of the ethanol biorefineries across the U.S.

Along with manufacturing state-of-the-art equipment, ICM is committed to adding even more value to your purchase. We can **design, build, install, and maintain** your entire system, including conveyors, drags, storage, and loadout; and we offer services from spare parts to training to condition monitoring in our effort to support the successful long-term operation of your equipment.

One-stop shopping

Working with one provider saves you time and money—and it makes managing the conditioning needs of your business as simple as picking up the phone.

Grain, Beverage, & Food Industry | Grain, fiber, and fine particulate powders

- Distillers spent grain
- Soybean flake
- Feather meal
- Brewers spent grain
- Soybean meal
- Fish meal
- Corn fiber
- Canola flake
- Dicalcium phosphate
- Corn gluten
- Whey proteins
- Sugar
- Corn germ
- Cottonseed meal
- Distillers dried grain
- Copra meal

Construction Materials | Aggregate

- Asphalt
- Brick
- Clay
- Sand
- Rock
- Other aggregate

Agricultural Industry | Pellets, voluminous leafy materials, fiber

- Fertilizers
- Tobacco
- Animal waste
- Phosphates
- Animal feed
- Agricultural residue

Chemical Industry | Liquid to powder

- Terephthalic acid
- Caustic soda
- Gypsum
- Isothalic acid
- Polyvinyl alcohol
- Limestone
- Salicylic acid
- Organic acid crystals
- Mining ores
- Soda ash
- Silica
- Aluminum phosphate

Other Applications

- Coal / coke breeze
- Rendering plants
 - Chicken rendering
 - Beef rendering
- Municipal solid waste
- Plastic / HDPE
- Wood products
- Paper sludge
- Rubber
 - Carbon black
 - Natural rubber
- Municipal sewer sludge
- Ceramics
